THOMSON INNOVATION

Patent/Publication: WO2004025895A1 SECURE BROADCAST/MULTICAST SERVICE

**Bibliography****DWPI Title**

Candidates authenticating method for multimedia multicast/broadcast application e.g. videoconference, involves verifying that public key got from each candidate is owned by that person and is related with Internet protocol address

**Original Title**

SECURE BROADCAST/MULTICAST SERVICE

**Assignee/Applicant**

Standardized: **ERICSSON TELEFON AB L M AHONEN PASI UUSITALO ILKKA MAENTYLAE VESA-MATTI**

Original: TELEFONAKTIEBOLAGET LM ERICSSON (PUBL)

**Abstract****Abstract**

A method of authenticating candidate members 1 wishing to participate in an IP multicast via a communication network, where data sent as part of the multicast is to be encrypted using a Logical Key Hierarchy based scheme requiring that each candidate member submit a public key to a group controller. The method comprises, at the group controller 1, verifying that the public key received from each candidate member 1 is owned by that member and that it is associated with the IP address of that candidate member 1 by inspecting an interfaceID part of the IP address.

**French Abstract**

L'invention concerne un procédé d'authentification de membres candidats (1) souhaitant participer à une multidiffusion IP par un réseau de communication. Les données envoyées comme partie de la multidiffusion sont chiffrées au moyen d'une hiérarchie de clé logique basée sur le schéma exigeant que chaque membre candidat soumette une clé publique à un contrôleur de groupe. Ce procédé consiste, au niveau du contrôleur de groupe (1) à vérifier que la clé publique reçue de chaque membre candidat (1) est en la possession de ce membre et qu'elle est associée à l'adresse IP de ce membre candidat (1) par inspection d'une part ID d'interface de l'adresse IP.
